1st day - 364 days follow

New Year's Day

Another unproductive day today.

David came in this morning and told us of some turmoil at their house last night. A disagreeable situation.

Today I watched most of the American Football league Championship game between Kansas City and Buffalo; and then the National Football league Championship game between Green Bay Packers and Dallas Cowboys. Both of them good games but I had other worries.

Tonight heard 4 sopranos on the Bell Telephone Hour.

Monday, January 2, 1967

2nd day - 363 days follow

Nothing but TV today: Rose Parade;
Sugar Bowl game; Rose Bowl game; Orange
Bowl game. Took all day and evening

Tuesday, January 3, 1967

3rd day - 362 days follow

At the office this morning. A very busy day. Got considerable done.

Carded the recent items in Ecology. Made pink sheets for two items in latest Copeia by Pough and Savage.

Took down the electric heater for repair. Got a hair cut. Made purchases in stationary store, bakery and at Treasles (Gilbert & Sullivan Patience). Went to Auto Club and bought 1967 licenses.

Shaw came in the afternoon and we went over his suggestions for the correction of the additions to Chapter 3; there weren't very many.

Gas Co man came in and fixed a leak in one of my basement heaters.

At about 2PM Grant Barnes of U.C. Press called and we made a date to discuss progress next Thursday 4 in at 11. Hope this will save writing a long letter.

Grant Barnes of the UC Press came in about 11 as expected and we discussed many aspects of progress (or lack of it) with the second edition. I made it clear that age was proving a severe handicap and the Press was in for disappointment because the manuscript was sure to be slow in becoming available. We discussed many aspects of the job. He is to write me concerning the matters discussed.

We went up to the Zoo for lunch with Shaw including Barnes' boy. We continued the discussion of the pending job; Shaw took part in the discussion. Then we went to the reptile house and looked at specimens. By that time I was pretty tired and went home.
Got my desk cleaned up in the late afternoon.

Several times we talked over a paper book condemnation of Kettlewakes. I am not fond of the idea; anyway it would come along much too late for me to participate.

Tuesday, May 16, 1967

136th day - 229 days follow

Spent a lot of time today on a complete physical examination by Dr. George Fishburn. Examination lasted from 10¹⁵ AM until 12³⁰.

The electrocardiograph showed a considerable deterioration since the last examination last March. George explained the difference but it was too technical for me to understand. What I did learn was that there is no reason why I shouldn't take nitroglycerine to relieve the pain of angina whenever it needed it; the repeated use is not deleterious. This is a great relief to me as I had not taken as much or as often as I seemed to need it.

He decided to put me on a course of Coumadin. First said I should go to the hospital for 3 days to a week so the effect could be noted but I balked at this and it was finally agreed that a technician would come to the house and make the required tests here. This will be much more convenient for me. Will begin tomorrow AM.

Had an extra blood test this AM and also X-rays to determine what causes my hip trouble.

Took a urine sample up to Fishburn's office this afternoon; also had my glasses fixed. I think the tests so far have been easy enough, and they have been a relief to me.

Wednesday, May 17, 1967

137th day - 228 days follow

Went to the opening of the new Speed Ramp at the Zoo at noon. Had lunch which was OK. Then they started the ramp. As usual it failed to work. Went up the old ramp to my car. Too long a walk and I felt it.

Called Fishbain and was told not to take any Coumadin pills today.

Thursday, May 18, 1967

138th day - 227 days follow

Winters came at 8 for another blood sample.

At the office most of the morning. Worked on hybrids but made little headway. Wrote some letters.

Friday, May 19, 1967

139th day - 226 days follow

and made progress but by 10³⁰ was too tired to
continue.

Almost too much of a walk.

Tuesday, May 23, 1967

Fishburn called and told me to take half a coumadin pill. Also to continue cystitis pills. Said Winters would call again tomorrow.

In the afternoon at 2 went to the annual Kiv Co stockholders meeting. I presided. Phil made the talk I have usually made in the past and did well. I got home at 4, quite tired.

An ex UC librarian named Coleman called for a chat this morning.

Wednesday, May 24, 1967

144th day - 221 days follow

This morning Winters came at 8 and made the usual blood test. Fishburn called at the office in mid morning. He said I was to take a whole tablet of Coumadin today.

I told him I was getting fed up on the blood tests, they were a nuisance and spoiled my day. He said they would probably end this week and then I would have them at weekly or monthly intervals. Told him I was annoyed by considerable skipping. He said he was going to see me next week for a re-examination and would then decide on a future course of treatment.

At the office this morning. Read many reports.

Called Chernoff and had a long talk on San Pascual. The proposed meeting with Fred Kinnzel was called off for this afternoon. He promised to write a letter about legal liability. Talked with Miss Breed about a trip to La Jolla to look at library sites. Maybe next Monday.

Worked some on Chapter 4 but got nothing done as there were too many interruptions.

Attended a long meeting of the Zoo Board of Trustees tonight. Didn't get home until 11. Rained the night to 12. I voted on a long discussion of San Pascual, mostly non pertinent.

149th day - 216 days follow

At 8³⁰ this morning Russ Breed picked me up and we drove out to La Bolla. First went to residence of Mrs. Vernon Gaston where we met Tom Scripps and Mrs. Widman. Drove around La Bolla in Scripps' station wagon and looked at about 10 possible sites. Then went back to Gaston's and sat in the car and discussed the good and bad points of the sites. Will have another special meeting to see what can be worked out. June 6th was suggested.

Saw Dr. Fishburn this afternoon at 2 and was given another physical examination. He was quite thorough in our discussions of my recent difficulties, especially the episode after Combs.

He phoned later and told me the urine was now OK; also the heart showed what he had expected to get out of Comaden. Told me to discontinue Persantin, which I hadn't been taking recently anyway. He now prescribed I sordil + Phenobarbital which I am beginning at once.

I am to see him again in about 2 weeks.

Tuesday, May 30, 1967

150th day - 215 days follow

Memorial Day

Today I listened to the records I recently bought from the Long Island City outfit. Some were good but not all by any means. I also catalogued them and put them away. The cabinets are much too crowded for convenient service. Wrote a few letters and cleaned up other odds and ends.

Wednesday, May 31, 1967

151st day - 214 days follow

At the office this morning.

First cleared up readings a lot of reports.

Then tackled hybrids once more and finally finished it. All that remains now is to make two manuscript copies -- one for the Press, one for reserve. Can't do this until prior parts are finished so that inserts can be given appropriate serial letters.

Shaw came around this afternoon with 33m pictures lately taken by Ron Garrison: *S. melanurus* from Carolina; *C. engelfurris* from B.C.; and *C. v. oregonus* from SW Oregon. All were good except the latter.

Thursday, June 1, 1967

152nd day - 213 days follow

At the office this morning, also to the bank.

Worked on the early parts of Chapter 4 and made some progress. But it is clear that too much time is lost getting oriented when it is dropped for a few days. I will have to work on it continuously to finish or it will never get done.

Talked to Harry late this evening.

Ray Cowles called from the Zoo this afternoon. We had a brief chat but I got switched to Chuck Shaw before we finished.

After supper I went over to the Zoo and had another talk with Ray about his present activities. We talked for about an hour. He has another book on the South African problems submitted to the University of Oklahoma Press but some of the anthropologists are highly critical, so maybe it won't be published.

Then went to the Philadelphia Symphony concert which I greatly enjoyed. Toccata and Fugue by Bach; Don Quixote by R. Strauss and Sibelius Symphony No. 2. The last was by far the finest item.

Saturday, June 3, 1967

154th day - 211 days follow

Got a start on the sacculus
ling but didn't do much more than
arrange data. It was an unsuccessful day.

Wednesday, December 6, 1967

340th day - 25 days follow

Had a tough night tonight as I expected to go out to La Mesa for my driver's test. Was worried about the test and also finding the La Mesa office of the Motor Vehicle department. However I drove out on 94 and found the office without much trouble. Registered for the test and got a tester without too much trouble. The test went fairly OK but of course I made all the usual mistakes. I was given a final score of 27 points off or 73 out of 100.

When I went in to the window in the office I didn't take in my score sheet which was probably an error; it was left lying on the front sheet. The tester had said "I am going to recommend you for a 3-year extension which, of course was highly satisfactory to me. However the man at the window left for a few minutes (probably to consult the tally sheet) and then reported they had agreed to give me a one year extension. This was very disappointing after what the examiner had told me. I shall write them and ask why.
